Ellisys introduces new Student Pricing Program for USB Tracker 110

Effective from September 18 through December 31, 2006, the USB Tracker 110 will be discounted to USD 400.00 for students, staff and faculty of technical colleges and universities.

Geneva, Switzerland — September 18, 2006 — Ellisys, a leading supplier of test solutions for Certified Wireless USB, today announced a Student Pricing Program for educational institutions. The program helps students, staff and faculty acquire a high-quality but low-priced USB protocol analyzer in order to maximize their educational experience.

Laurent Guinnard, co-founder, said "Several customers have contacted us after purchasing non-Ellisys budget analyzers which did not work as well as expected. These customers, and we assume there are others in the same situation, have wasted their scarce funds and are disillusioned with USB analyzers. We feel that students and educational institutions should be spared this negative experience."

Ellisys has demonstrated the company's support for education in the past by offering a long-standing academic discount program on Ellisys' Explorer line of advanced USB and Wireless USB protocol analyzers designed for professional use.

Availability

This special student pricing is only applicable to the USB Tracker 110. Customers must supply proof of their academic eligibility by submitting a fully-completed Student Pricing Coupon, which is available from dealers or can be downloaded from the Ellisys web site. This offer is valid only worldwide, and is limited to available stock. Sales must be transacted by December 31, 2006 to be eligible.

About Ellisys

Ellisys is a Test & Measurement company committed to the design and timely introduction of advanced protocol analysis solutions for USB devices, Certified Wireless USB and Ultrawideband. Developers have been using Ellisys' USB products and solutions for more than five years with great success. With the consumer electronics market moving toward wireless technology Ellisys proves once again its commitment to the developers' community. By providing WiMedia and Certified Wireless USB early adopters with the right tools at the right time Ellisys enables these promising markets to grow in a secure and confident manner, and ensures a rapid and wide acceptance of these technologies.
